

Marek Józwiak

Creative Developer

hello@madebyhex.com | github.com/66HEX | madebyhex.com | linkedin.com/in/marek-jozwiak

Education

Zespół Szkół nr 9 im. Romualda Traugutta, Koszalin

Electronics Technician

Sep 2014 – May 2018

Experience

WebGPU Shader Developer | *WebGPU, WGSL, Real-Time Graphics*

Moda | Contract | Remote (New York, United States)

May 2026 – Present

- Develop real-time shader effects for Moda.app's browser-based AI design canvas.
- Build GPU-driven visuals that enhance editable presentations, social assets, and branded design workflows.
- Shape the product's creative motion layer through production-ready WebGPU and WGSL shader work.

Creative Developer | *Next.js, React, Three.js, GLSL, Tailwind CSS*

shadcnblocks.com | Contract | Remote (Brisbane, Australia)

Sep 2025 – Dec 2025

- Built 20 immersive, reusable full-screen React hero blocks for production use.
- Combined React Three Fiber, Three.js, and raw GLSL shaders to deliver real-time depth and motion.
- Delivered modular components compatible with shadcn/ui and Tailwind CSS.

Partner | *React, React Three Fiber, GLSL, Tailwind CSS*

21st.dev | Contract | Remote (Dover, Delaware, United States)

Aug 2025 – Dec 2025

- Collaborated on reusable, production-ready React components for a community-driven UI registry.
- Designed component building blocks used by the MCP-powered generation workflow.
- Delivered modular components compatible with shadcn/ui and Tailwind CSS.

Projects

Frame | *GPUI-CE, Rust*

github.com/66HEX/frame | framegui.app

- Built a native media conversion app (Rust, GPUI-CE) with concurrent queue management.
- Implemented codec/container workflows, hardware-accelerated encoding, and preset management.
- Grew the project to 2000+ stars on GitHub.

Motion Core | *Svelte 5, OGL, GSAP, Rust*

github.com/kaltwrk/motion-core | motion-core.dev

- Built a curated Svelte 5 motion component ecosystem for experimental UI.
- Worked on production-ready animation components powered by OGL and GSAP.
- Supported a CLI-driven copy-paste component architecture for direct code ownership.

Spektral | *TypeScript, WebGPU, WGSL, Svelte 5, React, Vue*

github.com/kaltwrk/spektral | spektral.madebyhex.com

- Built a WebGPU framework for fullscreen shader pipelines with strict shader contracts and immutable material definitions.
- Delivered framework adapters for Svelte, React, and Vue on top of a framework-agnostic core.
- Implemented deterministic scheduling with dependency-aware `useFrame` tasks, multi-pass rendering, and GPU compute passes.

Tensum | *TypeScript, GSAP, Spring Physics*

github.com/kaltwrk/tensum | tensum.madebyhex.com

- Built a GSAP plugin backed by an analytical spring solver with duration derived from physical settling.
- Added timeline and controller APIs with velocity-preserving handoffs, stagger, repeat, and yoyo.
- Shipped CSS spring export, coupled-system utilities, and typed ESM support for modern browsers.

Skills

Languages: JavaScript, TypeScript, Rust, GLSL, WGSL

Frameworks: Svelte, SvelteKit, React, Next.js

3D and Motion: Three.js, React Three Fiber, Threlte, GSAP

Desktop: Tauri, GPUI

Cloud and Tools: Cloudflare, AWS, Git, Figma, Tailwind CSS

Certifications

Programming S7-1200 Controllers in the TIA Portal Environment

Siemens

Issued Jun 2017

AutoCAD Electrical

PROCAD SA

Issued Jun 2017

AutoCAD Level I

PROCAD SA
